Dear colleagues,

We are pleased to announce the 3rd International Workshop on Clinical Pharmacology of Anticancer Drugs, is scheduled to take place on 8-9 November 2018 in Amsterdam, the Netherlands.

The field of anticancer drugs is in continuous development. Given the many existing drugs with multiple unanswered pharmacological questions and with the introduction of the new group of agents with their unique pharmacological properties many studies are being performed which will lead to new perspectives. This meeting offers a platform for indepth discussion and debate among experts on new data and their implications.

We invite you to attend the International Workshop on Clinical Pharmacology of Anticancer Drugs in Amsterdam.

We look forward to greeting you.

Organizing Committee

Etienne Chatelut
PharmD, PhD
University Institute Cancer Toulouse Oncopole, France

Maria J. Garrido
PhD
University of Navarra, Spain

George Demetri
MD
Harvard Medical School, USA

Howard Gurney
MBBS, FRACP
Westmead Hospital, Australia

Nielka van Erp
PharmD, PhD
Radboud University Medical Centre, the Netherlands

Ron Mathijssen
MD, PhD
Erasmus Medical Centre, the Netherlands

Lena Friberg
PhD
Uppsala University, Sweden

Michelle Rudek
PharmD, PhD
Johns Hopkins University, USA

This meeting is organized by:

www.expertmedicalevents.com

WHO SHOULD ATTEND?

Medical oncologists, internal medicine doctors, clinical pharmacologists, hospital pharmacists, industry researchers, government representatives and other experts involved in this field of research.

Gain access to all the meeting presentations, webcasts, abstracts, and more!
MEETING OBJECTIVES

• To gather professionals in the field of pharmacology of anticancer drugs in an interactive workshop setting;
• To provide a platform for presentation and discussion of the latest pharmacological developments in the field;
• To map current studies and latest results;
• To translate new data into treatment opportunities;
• To educate clinicians on pharmacological challenges that need to be addressed with the implementation of current and new drugs.

Abstract submission is open until 1 September
Complimentary registration for young investigators with an accepted abstract.

Registration is open
Early registration discount is available until 7 March.

ABSTRACT TOPICS

• Pharmacokinetics and pharmacodynamics of anticancer drugs
• Population pharmacokinetics & pharmacokinetic-pharmacodynamic modeling
• Drug development and optimization: approaches & tools
• Drug-drug and drug-disease state interactions
• Anticancer drug therapies in special populations

Session topics:

• Pharmacological challenges of immunotherapeutics
• Combination therapy – old school is becoming new school again
  • Dose individualization approaches
  • Drug-Drug / Drug-Food / Drug-Environmental interactions
  • Approaches to shorten phase II studies by the use of different read out endpoints
• PK/PD studies and new strategies

ENDORSERS

Members of endorsing organizations enjoy additional 25% discount on registration fees.
