Join us to discover the role Microbiome plays in the pathogenesis, prevention and treatment of HIV/AIDS

ORGANIZING COMMITTEE

Charles Boucher, MD, PhD
Erasmus Medical Center, the Netherlands

Rick Bushman, PhD
University of Pennsylvania, USA

Stacy Carrington-Lawrence, PhD
OAR, NIH, USA

Ronald G. Collman, MD
University of Pennsylvania, USA

Satya Dandekar, PhD
University of California Davis, USA

Que Dang, PhD
DAIDS, NIAID, NIH, USA

Nichole Klatt, PhD
University of Washington, USA

Laurel Lagenaur, PhD (Co-chair)
NIH, USA

Alan L. Landay, PhD (Co-chair)
Rush University Medical Center, USA

Angela Malaspina, PhD
DAIDS, NIAID, NIH, USA

Piotr Nowak, MD, PhD
Karolinska University Hospital, Sweden

Cara Wilson, MD
University of Colorado, USA

Roger Paredes, MD, PhD
lrsiCaixa Foundation, Spain

MEETING OBJECTIVES

• To gather cross disciplinary professionals in the field of microbiome research to provide a better understanding of the impact of microbiome on host immunity.
• To develop a better understanding of how microbiome effects the pathogenesis of HIV across mucosal sites.
• To use our knowledge of the microbiome field in developing novel strategies for developing microbicides /vaccine for HIV prevention.

UNIQUE MEETING FEATURES

The meeting features for the workshop are to its multidisciplinary nature and significance in enabling to learn how the host microbiome can influence responses to our current HIV therapies, and to further our ability to develop novel prevention and therapeutic strategies for HIV that will lead to the reduction of new HIV infections and the burden of non-communicable diseases in HIV infected subjects.

TARGET AUDIENCE

Clinicians and researchers with interest in Microbiome in general and Pathogenesis in relation with HIV.

ABSTRACT SUBMISSION

We encourage you to submit your research on the following topics.
• Pathogenesis
• Technologies & Methodologies
• Microbicides / Vaccines
• Treatment & Cure
• Comorbidities

MEETING MATERIALS

Go to www.InfectiousDiseasesOnline.com to view the webcasts, presentations and abstracts of the previous workshops.

Preliminary Program

Tuesday, 16 October

09:30h Keynote
10:30h Session 1: Pathogenesis
13:00h Session 2: Transmission & Prevention
16:00h Session 3: GI Tract and Diet

Wednesday, 17 October

09:00h Session 4: Comorbidities
11:30h Session 5: Microbiome & Vaccines
14:00h Session 6: Metabolomics Biologic and Technical issues
16:30h Closing

“Microbiome research really helps to understand the immunity and disease pathogenesis. This workshop really covers all the aspect in microbiome.”
